## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 4\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Arjun is learning how to filter words from a sentence based on grammar rules. He wants to identify the valid words in a sentence.

A word is considered valid if it satisfies all these conditions:

The word contains only alphabets (a–z, A–Z). The word length is at least 2 characters. The word should not contain digits or special characters.

Your task is to read a sentence and print all the valid words in it.

##### ***Input Format***

The input contains a single line containing a sentence S.

##### ***Output Format***

The output prints all the valid words separated by spaces.

If no valid word exists, print "No valid words."

Refer to the sample output for formatting specifications.

### **Sample Test Case**

Input: Hello world1 123 ab" @#\$ Hi

Output: Hello Hi

### **Answer**

```
// You are using Java
import java.util.*;
class rec{
    public static void main(String args[]){
        Scanner sc=new Scanner(System.in);
        String a=sc.nextLine();
        String b[]=a.split(" ");
        int g=0;
        for(String j:b){
            int f=0;
            for(int i=0;i<j.length();i++){
                char s=j.charAt(i);
                if(!Character.isLetter(s)){
                    f++;
                }
            }
            if(f==0 && j.length()>=2){
                System.out.print(j+" ");
                g++;
            }
        }
        if(g==0){
            System.out.print("No valid words.");
        }
    }
}
```

**Status : Correct**

**Marks : 10/10**
